SURPRISING AFFORDABILITY
With systems starting at under $7k, V100 cameras deliver the industry’s most affordable high-performance tracking platform.

EFFICIENT PERFORMANCE
Our cameras are engineered for maximum capture efficiency, offering sub-millimeter tracking at a fraction of the price you would expect.

WORLD CLASS LENSES
We custom design our own super low distortion, high illuminance lenses. Our “fast glass” dramatically increases your camera’s range and capture volumes.

REFERENCE VIDEO
Any of your V100:R2 capture cameras can also operate in full frame grayscale, for flexible reference video that’s calibrated into your mocap system.

FILTER SWITCHER
Move from visible to infrared imaging with a single mouse-click, enabled with the FS add-on.

ON-BOARD PROCESSING
Our heralded real time, on-camera image analysis delivers clean, reliable data to your PC with minimal demands on your CPU for efficient system scaling.

CAMERA CONTROL
Control exposure, frame rate, resolution, image processing mode, LED intensity, and more directly from the application UI.

OPTISYNC
OptiTrack’s custom sync system, which sends and receives sync signals over USB cable. As a result, cabling is reduced by 50%, which enables simpler setup.

FREE CAMERA SDK
Integrate V100:R2 cameras into your custom tracking and vision applications with the free Camera SDK, which offers a simple C++ interface.
